

# Aluminum Flexible Liner

2-Ply, Type 3003 (.010 Thickness)

“Dalsin Line”® aluminum flexible liners are used for venting category 1 and direct vent appliances. Manufactured using Type 3003 aluminum, this heavy 2-ply liner is made from .005” thick, high grade aluminum for a total thickness of .010”.

## Features

“Dalsin Line”® flexible two ply aluminum is available with rigid ends to prevent unraveling of hose and makes joining to fittings and extension lengths easy.

Inner seams are crimped to prevent unraveling or separation.

## Ordering

All liners are shipped compressed to approximately 1/3 their original length.

10', 25', and 35' lengths available

50' lengths available for 3", 4" and 6" diameters.

Specify on purchase order the correct part number for rigid ends if desired.
