

Aluminum Rigid Liner & Fittings

Heavy 20 Gauge (.030 Thickness)

"Dalsin Line"® aluminum rigid liner and fittings are used for venting category 1 gas appliances. Made from heavy .030" thick material, this liner is the ideal choice for relining a chimney servicing a furnace or water heater. All fittings are also manufactured using heavy .030" thick aluminum.

Features

For venting gas fired appliances

Made from heavy .030 aluminum

Ordering

When measuring total run remember there is a 2" overlap at each section.
