

Pro-Form® Direct Venting

Flexible Aluminum Direct Vent Products

Patented US A #D562,959

The Pro-Form® direct vent system is tested and listed by Warnock Hersey to be used on direct vent gas fireplaces. The termination caps have been designed to perform in the most adverse weather conditions while providing an attractive appearance. The flexible direct vent pipe is ideal for horizontal corner, and up and out applications as well as venting up a wood chase.

Features

Termination caps provide ultimate curb appeal.

Air and water diffusion technology on vertical termination caps. All termination caps made from durable .030" thick aluminum.

Convenient co-linear (Insert Fireplace) kits.

Attractive mission style vent design on termination caps.

Flexible co-axial direct vent is sold pre-assembled as a concentric system.

Eliminates the need for expensive elbows in the system.

Available in all common co-axial and co-linear diameters.

This vent system has been tested and certified by Warnock Hersey for direct vent appliances. ANSI Z21 88 / CSA 2.00 (2005), UL subject 2112 (2000)
